ORDER TERMINATING  
RESTRICTIONS

TO PRACTICE NURSING IN THE  
STATE OF NEW JERSEY

---

This matter was opened to the New Jersey State Board of Nursing ("Board") upon receipt of respondent's petition for relief from all restrictions imposed by a consent order entered on April 9, 2013. That order required respondent's continued participation in the Professional Assistance Program of New Jersey (PAP). Respondent had been criminally charged with

attempting to obtain a prescription legend drug and to obtain controlled dangerous substances by fraud on November 23, 2011, and had been admitted into the Pre-Trial Intervention Program.

Respondent's advised the Board of her successful completion of the PAP monitoring program, and that she has been in documented recovery for more than three and one half years. Respondent further indicated that she had chosen to voluntarily remain in PAP for an additional year, to document her ongoing recovery. A communication from PAP's Executive Medical Director confirms that respondent has completed the PAP monitoring program, and supports the termination of any and all restrictions on her nursing license imposed by the 2013 consent order.

The Board finds that respondent has complied with the requirements of the 2013 consent order and has met the conditions set forth in that order for removal of restrictions. The Board thus finds that entry of the within order is appropriate and sufficiently protective of the public health, safety and welfare.

IT IS, ON THIS 26<sup>th</sup> DAY OF June , 2015

HEREBY ORDERED THAT:

1. Respondent's petition for termination of the restrictions imposed pursuant to the April 9, 2013 consent order is hereby

granted, and respondent's nursing license is no longer subject to restriction or encumbrance.
